

SEVEN PRINCIPLES

Enabling Your Digital Business

Enterprise Mobility Management

Savvy

MANY SKILLS. ALL-ROUND SKILLS. THE RIGHT SKILLS.

It is a fact that your business is mobile. Enterprise Mobility is key. Effective management of mobile devices and mobilized processes, as well as optimal integration is essential. Mobile Device Management (MDM) is the key. There are many features and functions. As a leader in enterprise mobility, we can promise you this: 7P MDM is the perfect solution, for implementing a successful management of your mobile fleet.

See for yourself:

One software – all platforms

iOS, Android, Windows Phone, Windows 8.1, Windows 10, Windows 10 Mobile

Device-specific extras

Samsung KNOX, KNOX WorkSpace, KNOX Mobile Enrolment, Huawei MDM, HTC PRO/PRO2, Android Enterprise, Google EMM, Apple DEP, VPP, ASM, Work Profile and Zero Touch enrolment

Everything is possible

- Device management (logging inventory, blocking, deleting, etc.)
- System management (backups, updates, etc.)
- Reporting (logs for all relevant processes)
- Integration (AD/LDAP, Azure AD, O365, F5, Radware, Odin Automation)

Productive working

- Time saving management of multiple devices:
Configure, update and maintain any number of mobile devices with just a few clicks.
- Automate processes
- Effortlessly integrate business processes through web APIs

Simpler, neater, better

The user-friendly interface is more than just attractive. It can be flexibly adapted to provide each user group with the perfect working environment. Moreover, the self-service portal provides a simplified interface for the end users.

As flexible as your needs

MDM is available in the form of Software-as-a-Service (SaaS), which is installed locally on your servers or delivered from a GDPR compliant German cloud solution

Security guaranteed

- 7P MDM is TÜV certified, GDPR compliant and additionally audited by an independent IT Security Company.
- Freely configurable actions in the event of policy breaches: What happens in response to errors is up to you.

Empathic insights

A PRODUCT IS ONLY GOOD IF IT MEETS YOUR REQUIREMENTS.

The difference between a good product and a better product is not the length of its list of features.

After all, a large number of companies know how to program. Rather, it is about complementing technical expertise with insights in and empathy for the users' situation and needs. This requires both an understanding of European business culture and the legal situation and requirements of those who work with the software. SEVEN PRINCIPLES is a consulting firm: A holistic approach with entrepreneurial aspects is part of our daily business. And it shows.

Service that understands you

SEVEN PRINCIPLES offers local support and service. You will not talk to call centre agents but with experts who know the software because, they were involved in its development.

Software for businesses, made locally

Developed in line with German/European legislation:

- Data protection laws and guidelines
- Works Constitution Act (works councils)

Security made in Europe

European companies take a different approach to (data) security than others.

7P MDM is developed in line the highest quality standards, runs on servers in Germany and is TÜV certified and GDPR compliant.

It's your money after all

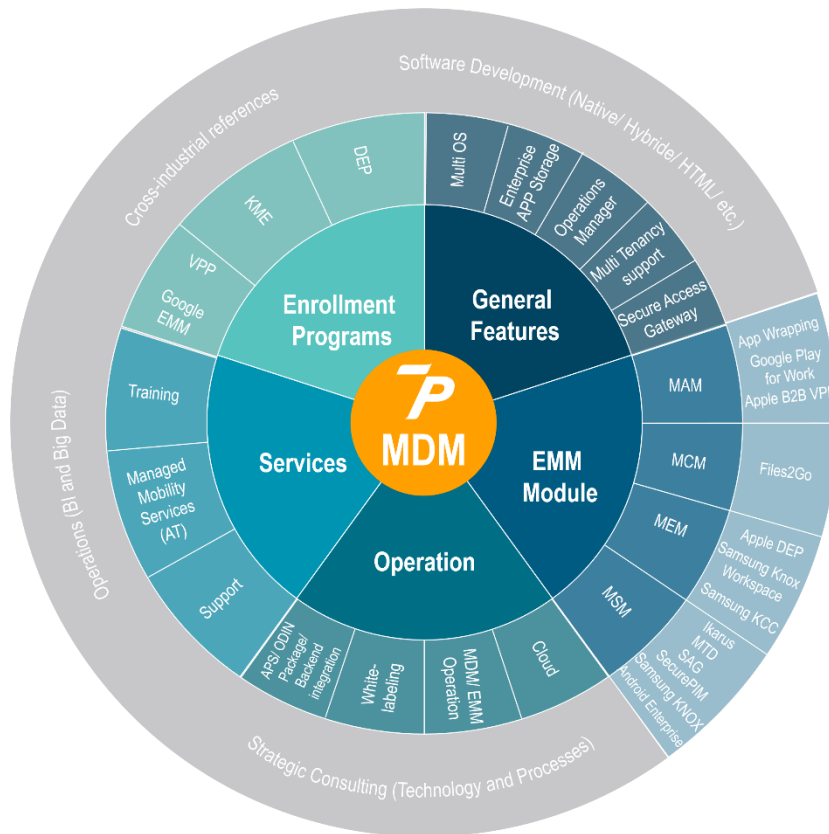

You need to spend your money on your business, not on software. We therefore offer a flexible "PAY-AS-YOU-GROW" model that gives you professional MDM from only 10 terminals.

A holistic view

SEVEN PRINCIPLES is one of the largest German IT consulting companies. It is part of our daily work to provide a profound understanding of MDM and guarantee full integration in corporate processes.

Fit for the future

Periodic automated updates and adjustments to future platforms ensure lasting productivity and (legal) security without any inconvenient operational interruptions.

A brick – or a whole building?

7P Enterprise Mobility

If you want to run a successful mobile business, you need to make a fundamental decision: Would you like to put together “only” individual components, or mobilise your entire workflow?

As the leading provider of enterprise mobility solutions, 7P offers you both individual solutions and all necessary concepts and components to ensure smooth and straightforward mobile work processes. 7P MDM is the key element here.

Contact 7P directly for more information on enterprise mobility and mobile device management:
